

PICO National Network | *Unlocking the Power of People®*

October 30, 2009

The Honorable Harry Reid
United States Senate
522 Hart Senate Office Building
Washington, D.C. 20510-2803

Dear Majority Leader Reid,

The success of health reform depends on making health coverage and care affordable for the millions of low-wage working families who make up the bulk of the uninsured. The majority of people who will come to rely on subsidized coverage in the Exchange have incomes below 250% of the FPL, about \$46,000 for a family of three. In Nevada, 300,000 people, six out of every ten people in the state who are uninsured, fall within this income range. These families often find themselves struggling to make ends meet, let alone afford thousands of dollars in health costs.

We believe it is vitally important that - as you work to develop the best possible health reform legislation that can pass the Senate - you do everything possible to lower premiums and out-of-pockets costs on low-wage working families who are least able to bear the brunt of an individual mandate. That is why we are alarmed by reports that suggest that your merger proposal may not make significant improvements over the Senate Finance legislation in affordability for low-wage working families, and may in fact increase premiums on people at lower-income levels.

Our faith, labor, consumer, public health and patient organizations represent millions of American families who actively support health reform, but they need to know that reform will make coverage affordable not place an unsustainable burden on those who today lack coverage. As many interests vie to influence the health reform process, it is important that working families not be left with the short-end of the stick.

We look forward to working closely with you to assure that health reform is truly affordable for America's hard working families.
